WORLD ENVIRONMENT DAY, 2024

June 5, 2024

Connecting with the world’s theme

DESERTIFICATION & DROUGHT RESILIENCE.

The World Environment Day, 2024 was hosted by The Kingdom of Saudi Arabia with the theme Land Restoration, Desertification and Drought Resilience. The idea is to restore dry lands and deserts through afforestation and a few latest technological aids. Apart from protecting the existing cultivable land and dense forests, it is also very important to restore deserts.

Students displaying models in Model making competition organized at our Institution.

Our land, Our Future. We are #Generationrestoration.

The students from 6th standard to 10th standard participated in a class wise **Model Making Competition** separately from State Board and ICSE Board. Models on Deforestation, over grazing, Landslides, Desert vegetation, Dry Land Irrigation, Desert Irrigation, Afforestation and Charts related to the theme of replenishing the deserts were beautifully and aptly displayed by the students. Students from 1st to 10th standard visited the exhibition of models and heard the explanation to know more about the concept of regenerating the deserts. The **Assembly activity** spoke about the importance of protecting the Environment. The idea of ‘Go Green’ was stressed by making Green as the dress code. As an extended part, **Dr. Hallegere Murthy**, Founder CEO of Scope Foundation (a voluntary organization for Eco-friendly activists) taught the students a simple chant on ‘**Bhoodevi**’ that is experimentally proved to enhance energy levels in our body. He advised to seek energy from nature which could be used constructively to improve one’s performance.

‘Planet over Profit’ because Earth’s Beauty is our Duty.
